15   7.   A computer readable medium including a software application for enabling interactive access to and verification of agent commission information, said software application comprising:

one or more instructions for receiving agent identifying information and agent commission information;

20   one or more instructions for analyzing and sorting the received agent identifying information and agent commission information;

one or more instructions for saving the agent identifying information and the agent commission information;

one or more instructions for providing an interactive display of the agent

25   identifying information and the agent commission information;

one or more instructions for providing interactive access to a display of detailed agent identifying information; and

one or more instructions for providing interactive access to a display of detailed agent commission information.

8. The software application of claim 7, wherein said agent identifying information comprises:

a writing code;

a name;

an address; and

a telephone number.

9. The software application of claim 8, wherein said detailed agent commission information comprises:

policy information; and

commission detail information.

10. The software application of claim 9 wherein said policy information comprises:

a policy number;

a client name;

a product name;

a company name; and

an issue date.

11. The software application of claim 9, wherein said commission detail information comprises:

an estimated commission processing date for a commission;

a face amount of a policy;

a premium for a policy;

a mode for the premium of a policy; and

an issue age of a policy.

12. The software application of claim 9, wherein said commission detail information further comprises:

a split percentage of a policy;

a commissionable amount of a policy;

a commissionable rate of a policy;

an estimated gross commission for a policy; and

a reference number for a commission.

13.   A server system for enabling interactive access to and verification of agent commission information, said system comprising:

a receiving element for receiving agent identifying information and agent commission information;

a processing element for analyzing and sorting the received agent identifying information and agent commission information;

a saving element for saving the agent identifying information and the agent commission information;

a displaying element for providing an interactive display of the agent identifying information and the agent commission information;

a first interface element for providing interactive access to a display of detailed agent identifying information; and

a second interface element for providing interactive access to a display of detailed agent commission information.

14.   The system of claim 13, wherein said agent identifying information comprises:

a writing code;

a name;

an address; and

a telephone number.

15.   The system of claim 13, wherein said detailed agent commission information comprises:

policy information; and

commission detail information.

16.   The system of claim 15 wherein said policy information comprises:

a policy number;

a client name;

a product name;

a company name; and

an issue date.

17.   The system of claim 15, wherein said commission detail information comprises:

an estimated commission processing date for a commission;

a face amount of a policy;

a premium for a policy;

a mode for the premium of a policy; and

an issue age of a policy.

18.   The system of claim 15, wherein said commission detail information further comprises:

a split percentage of a policy;

a commissionable amount of a policy;

a commissionable rate of a policy;

an estimated gross commission for a policy; and

a reference number for a commission.
